## Research projects

### Manager

1. Study of technological properties of fish proteins to be used as fish functional ingredients, Grant CNCSIS A 33445/2002, 2002-2004
2. Qualitative characterization of sturgeon fish culture, Program AGRAL, Contract 353/2004-2006, INDAL-PED, 2004-2006
3. Monitoring residual nitrates and nitrites in different meat products during manufacture and storage, Grant CNCSIS, A 446/2004, 2004-2006

### Team member

4. Obtaining metal-proteins and metal- plasteins to be used for controlling nutritional deficiency of iron and zinc, Grant CNCSIS C 6052/1998-2002
5. Biotechnological research for obtaining and using some food additives such as aromatisants from yeast. Grant A, cod CNCSU/1998
6. The researches concerning using different natural microbial systems for decreasing technological process and increasing conservation of some meat products. Program AGRAL nr. 4206/12.10.2001.
7. The realization of meat products with salt and aboriginal seasonings premix for diabetics. Subprogram S 5 INDAL PA, 5505/2004-2006.
8. Study of the cellular response at metabolic stress factors of several *Saccharomyces* strains with industrial usages. Grant tip A CNCSIS cod 511, 2001-2003
9. Innovative biotechnologies for getting and processing healthy and safe fish products (BIOSIG), PNCDI, 4th Program, Partners, Direction 6, 62-080/01.10.2008, DC 6, PC, 2008-2011

### Manager and Team member
