

**PROGRAMME “PLATFORM / INTERDISCIPLINARY
FORMATION & RESEARCH LABORATORIES”**

TOPIC

***Integrated Research and Formation Center
for Applied Biotechnology in Food Industry***

BIOALIMENT

CNCSIS CODE : 62

project funded by Ministry of Education and Research
order 4873/08.08.2006

Duration: 2006 – 2008 (24 months)

Budget: 4 570 000 RON = 1 352 000 EUR

MANAGEMENT&COORDINATION COMMITTEE

Project coordinator: Prof.dr.ing. Gabriela BAHRIM

Administrative coordinator: Conf.dr.ing. Anca NICOLAU

Formative programme coordinator: Conf.dr.ing. Luminița GEORGESCU

Tradition of food engineering school in Galati and sustained development since 70s in

{ INDUSTRIAL MICROBIOLOGY
FOOD BIOTECHNOLOGIES

1990 Bachelor programme in *Applied Biotechnology*
now *Industrial Biotechnology*

Opening of Research Center Establishment
Food & Aquaculture Biotechnologies

Phisico – Chemical & Microbiology Analysis Lab

2001: CNCSIS recognition

2004: national accreditation by RENAR

MIUG Microorganisms Colection

national and international recognition

http://www.wfcc.info/who_list.html

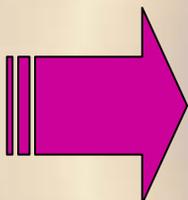

Large number of **PhD thesis** in the field of Food Biotechnology

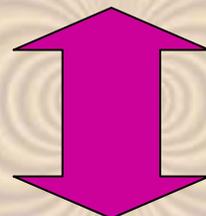

Many **Biotechnology research projects** won in different competitions

organizing a **modern excellence formation and research center**, that allows integration in research – development – innovation international programmes

creating a **research and academic education pole for food science and technology**, in tune with national and international strategies

European strategies

*Food, Agriculture and
Biotechnologies*

*7th Framework Project
of European Union for
R&D 2007 – 2013*

National strategies

Thematic areas

- *CNCSIS Projects*
- *Excellency Projects*

- **Biotechnology of microbial and plant cell culture**
- **Biotechnology of enzymatic preparations**
- **Biotechnology of food bioaditives and bioingredients**
- **Biotechnology of biopreservatives**
- **Functional foods**
- **Biotechnology and food safety**
- **Environmental Biotechnology– Bioremediation**
- **Bioprocesses modeling**

Research & Formation Departments

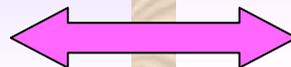

**APPLIED
MICROBIOLOGY**

**BIOCHEMISTRY AND
MOLECULAR
BIOLOGY**

**GENETIC
ENGINEERING**

**FOOD BIOADITIVES
AND
BIOINGREDIENTS**

FUNCTIONAL FOODS

Laboratories

Culture and fermentation lab

Molecular separation lab

Genetic engineering lab

**Food bioaditives and
bioingredients lab**

Biomass processing lab

Infrastructure Improvement During this Project

2006	2007 	2008
HPLC system	Capillary electrophoresis and mass spectrometry	Orbital shaker with thermostat
Lab bioreactor for microbial cultivation (1L)	Pilot bioreactor modular fermentation	Climatic chamber
Lab bioreactor for plant cultivation (3L)	Stereomicroscope with digital camera	Horizontal gel electrophoresis system
Phase contrast & epifluorescence microscope	Vacuum concentrator	Microtome
REAL TIME - PCR	Ultrafreezer	Rotoevaporator
Spectrophotometer UV – VIS	Ball mill	Aquaspector
Drying oven with temperature recording STERICELL (2 pieces)	Freeze dryer	Laminar Flow Cabinet (2 pieces)
Autoclave with sterilization parameters recording AE 75- DRY (2 pieces)	Laboratory binocular microscopes (30 pieces)	Automated culture media preparation
Drying oven with natural convection system ED 115 (115 L)	Ultra pure water system MILLI Q	Glassware Washing Machine
Centrifuge with cooling system		

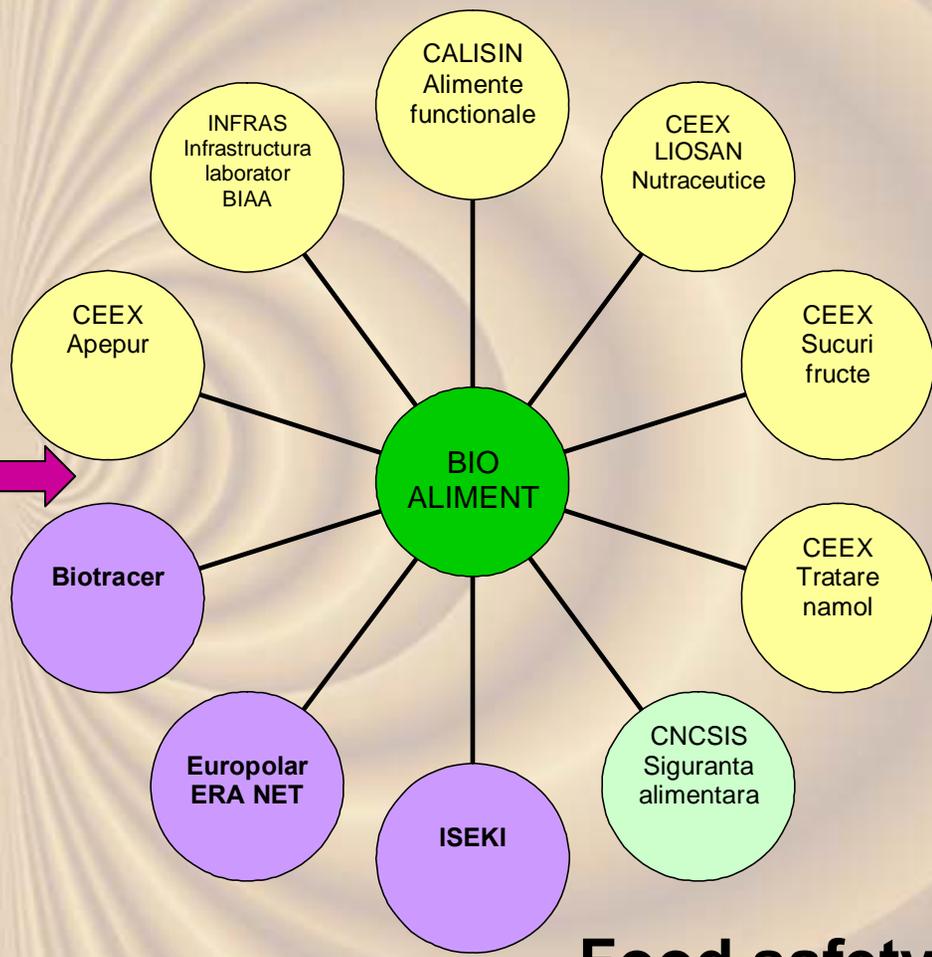

Sustainable strategic development plan of the platform

Sustainability of BIOALIMENT platform is ensured by:

- national & international research grants
- increasing the number of external users
- post – graduation training
- auto financing
- consultancy activities
- sponsors

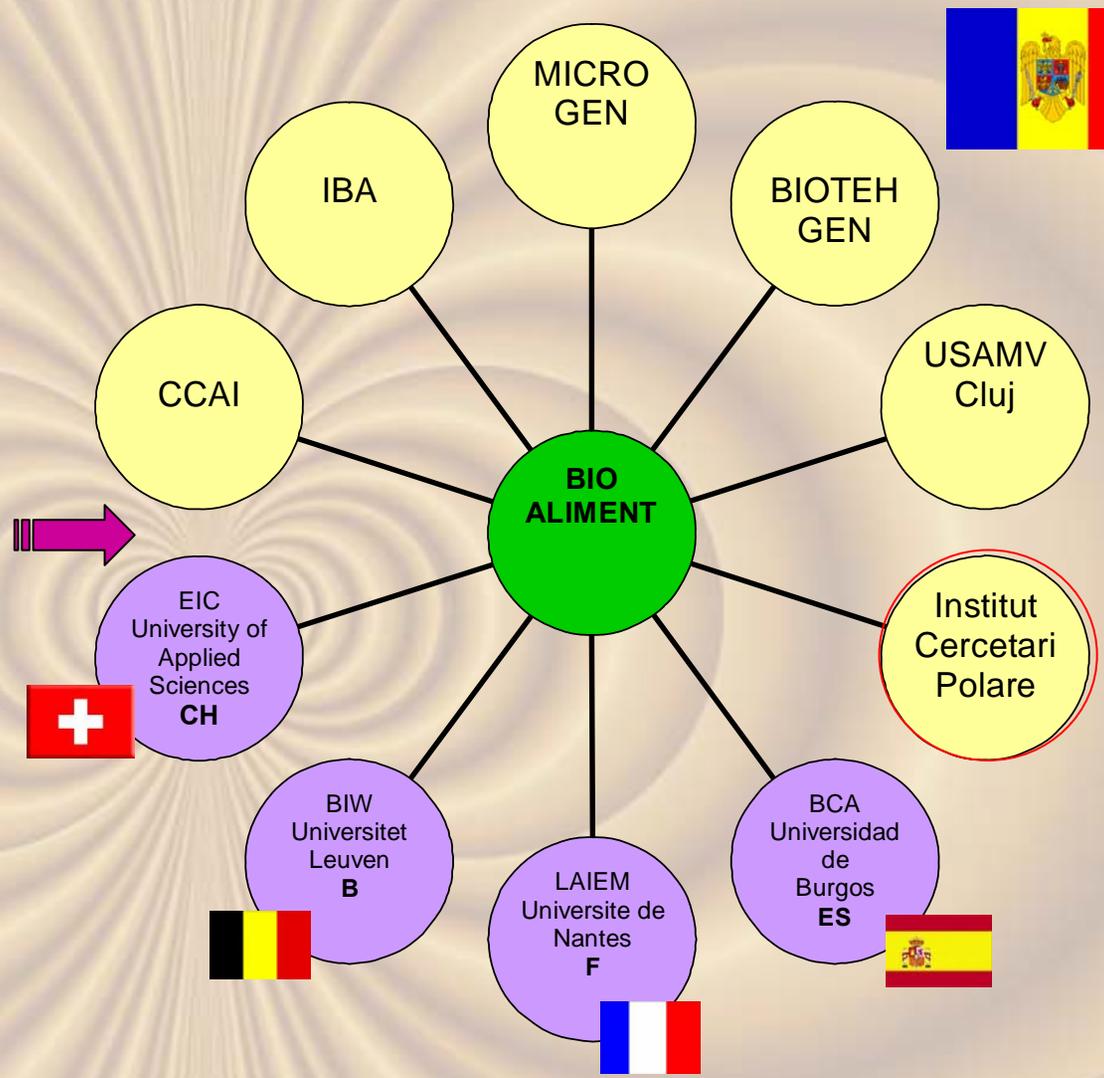

Food safety

PARTNERSHIP

**Interdisciplinary
research
collaboration**

**National and
